Why Study at UJEP in Ústí nad Labem

A Glimpse at the History of our University

Facts and Figures

Why Study at UJEP in Ústí nad Labem?

Come and study at the university in Ústí nad Labem, named after the world famous scientist Jan Evangelista Purkyně. Link one phase of your life to Czechia – the heart of Europe.

There comes a time in every individual's life when a serious decision about the future has to be made. You may be at that point if you:

- are going to complete your secondary education and are choosing the university to attend and/or are considering studying abroad,
- are already a university student and would like to spend one or two terms abroad,
- are already a university student and would like to gain several weeks of experience abroad,
- are a university professor and would like to travel abroad to teach for several days or weeks,
- are a university professor and would like to change your place of employment and travel abroad to work.

If so, read all of the following informational material about the J. E. Purkyně University (UJEP) carefully and when you have done so, decide whether this university has captured your interest and you wish to consider the options of studying in Czechia. Every change in one's life is very difficult and making the decision to travel abroad is twice as hard. But be sure you will not regret making the decision to travel to Ústí nad Labem and to UJEP.

The university we invite you to visit is located in a North Bohemian industrial town, located in the beautiful valley of the river Elbe. This environment creates an excellent base for natural science as well as environmental and also economic fields of study. Equally, the varied history of the region and the abundant cultural and social opportunities create a good basis for the development of social sciences and arts.

UJEP is one of the chief agents supporting and influencing significantly the development of the whole region – from the economic, social and cultural aspects. By training young and professionally educated people, the university supports regional economic revitalization and development.

The existence of a strong university such as UJEP in the region has also motivated entrepreneurs to establish and develop new enterprises since those have a stable source of university- educated employees. And, of course, this is also linked to the fact that new companies provide new employment chances for graduates and drive young people to remain in the region. At the same time companies are a guaranteed potential support of their research and these companies in turn create a potential for the university to commercialize the results of its research and development.

You can expect to make a number of new friends in a pleasant university environment, which will offer cultural along with sports opportunities, as well as intellectual enhancement. You can also look forward to experiencing beautiful scenery and a lot of new-life and work opportunities. You will become a respective part of a large academic community and will be given the opportunity of not only being a simple consumer of data, but also demonstrating your abilities, who you are and whether you are capable of using the chances offered to the best possible extent.

Why Study at UJEP in Ústí nad Labem?

Before you make up your mind, we would like to suggest 10 crucial reasons for spending at least one stage of your life at J. E. Purkyně University in Ústí nad Labem:

1. A young, open, dynamically developing university.
2. A wide range of study programs and fields of study.
3. Strategic location – between Prague (the capital city of Czechia) and Dresden (the capital city of Saxony, Germany).
4. Beautiful surrounding areas, a protected nature reserve, Porta Bohemica.
5. Interesting history of the region, a number of preserved historical monuments.
6. Excellent conditions for students interested in sports and/or arts.
7. Excellent cultural points of interest on both, the Czech and German, sides of the border.
8. Lower living expenses in comparison to other regions, quality accommodation with broadband Internet access.
9. A wide range of opportunities for acquiring a social grant.
10. The opportunity of acquiring paid residency and/or part-time employment.

We hope all those of you who decide to visit Ústí nad Labem briefly or for an extended period will enjoy returning to their Ústí Alma Mater.

The University in Ústí nad Labem bears the name of Jan Evangelista Purkyně (1787–1869), the famous Libochovice-born Czech, considered to be one of the most significant natural scientists and physicians.

Higher education in Ústí nad Labem has had almost 60 years of its tradition. In September 1954, the Pedagogic High School of Ústí nad Labem was founded as the first teacher training high school, and the

second high school in the Northern Bohemia region.

A government decree of September 1959 established a new Pedagogic Institute in place of the Pedagogic High School, of which the aim was to organize the complex education of elementary school teachers. Another decree of August 1962 removed pedagogic institutes from the authority of Regional People's Committees and related them directly to the Ministry of Education and Culture. This leap granted the highest level of independence and prestige to the Institute.

The significant development to follow was the establishment of the Pedagogic Faculty in 1964. Since that time the Pedagogic Faculty has become the only training institution in the region, training primary (and later also secondary) school-teachers. In 1977, there were significant changes in both the content and extent of activities. Under the new educational system – a unified five-year preparation course for middle-school teachers (5th–12th grade) was introduced, placing the Pedagogic Faculty on the level of other university faculties. A five-year course for 1st–5th grade

A Glimpse at the History of our University

elementary school teachers was also available. The new higher education legislation permits organization of state viva examinations at the faculty. Students graduating with the faculty's high school diploma could pass a state viva examination and acquire the degree of Doctor of Pedagogy (PaedDr.).

The political and social changes in the country after November 1989 have significantly affected the life of the Pedagogic Faculty. The Ústí nad Labem region was badly affected at the Communist times by mining and heavy industries, and was unattractive to professionals from other regions. On the contrary, due to bad environmental conditions, there was a heavy outflow of qualified workers. Under these circumstances, the faculty members and staff realized that teacher training should be incorporated into the wider framework of professional education, and as a result, Jan Evangelista Purkyně University in Ústí nad Labem was established according to the decree of the Czech National Council of 9 July 1991, which took effect on 28 September 1991.

The University consisted of three faculties (Faculty of Education, Faculty of Social & Economic Studies and Faculty of Environment) and two Institutes (Institute of Slavonic & German Studies and Institute of Roma Culture Studies) at the time of its foundation in 1991. In September 1993 the Institute of Artistic Culture was established: and was transformed into the Faculty of Art & Design in 2000. The Department of Technical Education of the Faculty of Education became the Institute of Production Technology & Management in autumn 1998. In 2003 the Institute of Health Studies was founded. Resulting from the transformation of the Faculty of Education, two new institutes (Institute of Science, later the Faculty of Science, and Institute of Humanities) loomed in 2005. In 2006 the Institute of Production Technology and Management was transformed into the Faculty of Production Technology and Management (currently: Faculty of Mechanical Engineering) and the Institute of Humanities was transformed into the Faculty of Philosophy (currently: Faculty of Arts). The youngest University branch is the Faculty of Health Studies (2012).

in Ústí nad Labem**

ECTS Information Package

Faculty of Art and Design (FUD)

The faculty was established in 1993, originally as an Institute of Arts. The turn-point in its career was the year 2000 when the institute was transformed into the Faculty of Art and Design. The concept of the faculty was originally based on the traditional art and crafts production, rooted in different local branches of glass, ceramic and fabric manufacturing of Usti region. Nowadays the FUD is considered one of the leading art and design schools in Czechia.

During last 20 years the Faculty of Art and Design has won a reputation of expanding flexible school offering study programs in art, design, graphic design, photography and electronic media including master program in Fine Art – Photography in English and PhD program in Visual Communication

open for international applicants. Faculty cooperates with galleries, museums, schools and other international partners in EU and outside EU as well. Particular faculty departments co-work with Czech and foreign manufacturers and institutions in specific projects. The projects are open for international students.

Since October 2008 the faculty has been situated in the newly rebuilt and top quality-equipped building on the territory of the UJEP campus in the centre of Ústí nad Labem. Here, one finds studios with up-to-date equipment, assembly halls, high-tech classrooms, workshops, printing facilities and a computer centre. The faculty runs a book production in own publishing house.

Approximately 400 students from all Czechia and abroad have enrolled within the Bachelor, follow-up Master and Ph.D. study programs up to the present day.

Faculty of Arts (FF)

The Faculty of Arts was founded on September 1, 2006 by merging the Institute of Humanities, which then had been a part of the university since 2005 and accredited new non-educational study programs in the course of the transformation of the Faculty of Education of the J. E. Purkyně University.

The Faculty of Arts is the only humanities-oriented institution conducting research activities in the Northwest Bohemia region. Research activities are primarily focused on areas related to the specifics and needs of the region, thus fulfilling the social relevance. The emphasis is on the national and international context of the discourse; mainly the main research issues that accomplish social relevance of the research, which has an indisputable social benefit.

- 1) Historical Research emphasizes the issue of border areas, cultural transfers, Czech-German (Czech-Saxon) relations.
- 2) Research in the Field of Cultural Heritage is focused on documentation of monuments, monument care, restoration and preservation of the cultural values, including the cultural landscape.

- 3) Philological Research is focused on German language and literature, with an emphasis on intercultural German Studies.
- 4) Political Research responds to the issues of electoral systems, electoral behaviour (including gender issues), regional and local government policies, manifestations of extremism and racism (with an emphasis on the Czech-Saxon region).
- 5) Research in other humanities (Philosophy, Ethics) is focused on the issue of the development of civil society and is related to teaching social science subjects at primary schools and high schools (specialised didactics) including teaching activities focused on public space.

The Faculty of Arts also either ensures or participates in teaching-focused study programs. The faculty enrolls about 1 000 students.

Faculty of Education (PF)

The Faculty of Education is at the frontier of shaping a person's personality in various spheres of society's life for more than 60 years. Those who venture here—to learn, research, teach, work, and build relationships – join almost 3000 students (both daily and part-time students).

Their professional education is provided by 10 academic departments, the Centre for Pedagogical Practice, Language Centre and the Lifelong Learning Centre.

Its mission is to provide quality **higher education to the pre-school, primary, lower and upper secondary school teacher trainees, and prospective special and social pedagogy professionals**

in undergraduate and post-graduate study programs

including master study programs. The faculty also provides **PhD study in the field of Czech studies, music**

education, visual art education and primary science education. Habilitation and professorial procedures are provided in the field of music education and visual art education.

Education provided beyond the frame of teacher training and school education is represented by Czech for public communication undergraduate courses, and Sport and health postgraduate courses.

The importance of education is enhanced by the strong incorporation of inclusion and the diversity of students who are interested in both classical and non-traditional topics in their live experiences.

Quality as major objective also applies to the activities of the faculty Lifelong Learning Centre where numerous lifelong educational study programs and courses are offered mainly to teachers and other educators.

Faculty of Environment (FŽP)

The Faculty of Environment is one of the three original faculties founded back in 1991. The study programs have interdisciplinary character and reflect contemporary environmental research issues. The mission of the faculty is to develop interdisciplinary education and research activities and to combine focus on sustainable development with specialized study fields.

Research activities of the faculty are focused on the development of research teams in the fields of:

- 1) Landscape Restoration
- 2) Study of environmental disturbances caused by chemicals
- 3) Geography Information Systems application

Student and staff mobility is mainly realized within the Erasmus+ program. Ministry of Education of CR programs and other exchange programs are used as well. The faculty cooperates closely with many European and Non-European institutions (e.g. Envirocentre in Glasgow, Scotland, Umweltzentrum Dresden, Germany) within internships, lecturing and research activities.

The faculty enrolls several hundreds of students each year, studying both in full-time and part-time study programs.

Faculty of Health Studies (FZS)

The Faculty of Health Studies UJEP is the youngest faculty of the university. It was established on the 1st of March in 2012 as a result of transformation of the Institute of Health Studies UJEP. The establishment of the Institute of Health Studies in 2003 was the necessity driven by new special requirements on education appeared in Health care because of the membership of Czechia in the EU and because of the demand from the side of regional health care settings. Tertiary education follows the concept of educational process in health care professional fields. It allows getting qualification in non-medical professional branches and carrying out professional activities related to health care services.

In the field of science and research, faculty's departments are focused on the issues related to their specific fields of education, specifically theoretical, clinical, medical and nursing branches with the emphasis on occupational therapy, physiotherapy, midwifery, pediatric nursing, general nursing and ambulance. The faculty has seven accredited fields of study in bachelor degree: occupational therapy, physiotherapy, midwifery, general nursing, pediatric nursing, paramedic

studies and newly radiological assistance. All of them are offered as full-time and also most of them also as a part-time degree programs and two accredited field of study in master degree: Organization and development in healthcare facilities offered as full-time and part-time degree program and also Teaching of specialized subjects for medical schools offered as a full-time degree program.

In 2021 was established a Research center which focuses on grants and international projects. To improve the qualification of academic staff and students two laboratories were set up: the Laboratory for human motion study and Laboratory of prevention and health support. The Faculty together with the Regional Hospital established 12 clinics including, ophthalmology, radiology, neurosurgery, cardiology, gynecology and obstetrics settings. Clinical and practical training within accredited degree programs and related research and development activities are carried out there. The faculty has around 1000 students.

Faculty of Mechanical Engineering (FSI)

The Faculty of Mechanical Engineering was established on the 1st of September, 2006. The faculty achieved a major milestone in the year 2020, during which the construction of the new modern building CEMMTECH (Centre of Materials, Mechanics and Technologies) has begun. In 2022 the new building was finished.

Our faculty offers a wide range of study programmes focused on the current needs of the industry with an emphasis on a co-operation with companies from the Usti region. The profile of educational and research activities of the faculty includes mainly the fields of materials, technologies, technical design and energetics.

As of now, you can choose from 5 bachelor study programmes, 4 master study programmes and 1 doctoral study programme. We put a great emphasis on practical knowledge, so we make sure that, during your studies, you will learn how to set up, operate and correctly handle modern instrumentation and methods, which are used in the industry to ensure that you will

be familiar with the equipment you will encounter in your future career. During later courses, according to your specialisation, you will further expand your knowledge on specific high-end instrumentation.

We closely cooperate with our industry partners, mainly in the fields of nanomaterials, modern automation technologies, additive technologies, Industry 4.0, modern measuring methods and many others. We are actively participating in the energetic transformation of the Usti region, with our main focus being advanced accumulation systems and the production and use of green hydrogen. Furthermore, we are leading or participating in other projects regarding the research of materials and technologies used in energetics.

Approximately 500 students, part- and full-time studies combined, are currently studying at our faculty.

Faculty of Science (PřF)

The Faculty of Sciences of the university in Ústí nad Labem is a modern tertiary institution and the largest institution in the Ústí nad Labem region focusing on education and development of knowledge in natural sciences. In addition to its tradition spanning over more than sixty years, the university offers unconventional backdrop of the natural beauties of Northern Bohemia (the Elbe valley, the Bohemian Switzerland and the Central Bohemia Uplands national parks). The intimate environment and individual approach to students are among the strengths of our university.

The faculty provides tertiary education at all three levels (Bc., Mgr., Ph.D.) for natural sciences experts and for future natural science teachers at primary and secondary schools. The faculty cooperates with numerous Czech and foreign partners, as well as the private sector.

Study programs

The faculty offers a wide range of fields, starting from biology and physics through geography and information technologies to

mathematics and chemistry in fulltime or combined mode of study. The most recent additions to the fields taught at the faculty include Applied Nanotechnologies, Applied Plasma Technologies, Chemistry and Toxicology, Computer Modelling in Science and Technology, Geographies of Transformations and Applied Ion Technologies.

Employment

Graduates find employment in public administration institutions, bodies and institutions of the European Union, nature conservation, land-use planning, laboratories, research institutes, in tourism, as network administrators or programmers and developers of web applications in the public and private sector. Last but not least, some of our graduates work as natural sciences teachers at primary and secondary schools.

Faculty of Social and Economic Studies (FSE)

The Faculty of Social and Economic Studies is the only public faculty aimed simultaneously at both economics and social work studies in the Ústí region. It was established in 1991 and its main mission is to prepare qualified specialists for both, the public and private spheres.

Lectures take place in up-to-date classrooms equipped with all the necessary technical support. Several computer rooms and an internet café are at students' disposal in the faculty building itself. Apart from the tuition, the faculty also supports sports and other interest-based activities of our students (e. g. tennis or bowling tournaments).

Generally high standard of education is also maintained by the support of specialized workplaces. One of the significant workplaces is the City&Guilds accredited language qualification center created on the basis of the Department of Foreign Languages. It carries out its activities with the support of the British Council and the Ministry of Education, Youth and Sports of Czechia.

General information

The average cost of living for students in Ústí nad Labem is approximately 350 EUR (8,500 CZK) per month (including accommodation in the halls of residence, meals at a students' canteen and other costs). The expenses are higher at the start of studies (or the beginning of term) – as one should pay for a student card, city transport season card, library registration etc. (see below).

Catering Services

Catering for university students and employees of UJEP is provided by the canteen located in the Campus (Pasteurova 3632/15, 400 96 Ústí nad Labem) and by "50 bar" located next to the Faculty of Education (České mládeže 8, 400 96 Ústí nad Labem). Further information to be found at: <http://skm.ujep.cz>.

Accommodation

At the present moment, the price of accommodation at the UJEP halls of residence is approximately CZK 3000 a month. The current price list is available at <http://skm.ujep.cz>
→ "Accommodation office".

Student card

Student card is issued in the form of a chip card, available in two versions:

- a) Without an ISIC licence: 100 CZK/year
- b) With an ISIC licence (full-time students only): 280 CZK/year

More at:

http://renee.ujep.cz/rene/online_zadost_en/

City transport

Student season ticket includes special fares for students under 26 and is available on providing a student chip card at the Dopravní podnik Ústí nad Labem (Ústí nad Labem) counter.

Student season ticket (for students under 26)

Library fee

Registration in the libraries of UJEP is free of charge.

More at: <http://knihovna.ujep.cz/>

The student registration fee at the Severočeská vědecká knihovna (North Bohemian Research Library), Ústí nad Labem is 200 CZK a year. More at www.svkul.cz.

1. UJEP units provide university education within the scope of study programs accredited by the CR Ministry of Education, Youth and Sports. Bachelor's study programs prevail within the fields of study on offer. Doctoral study programs are accredited at the Faculty of Arts, the Faculty of Art and Design, the Faculty of Environment, the Faculty of Education, the Faculty of Mechanical Engineering, the Faculty of Science, the Faculty of Social and Economic Studies. The UJEP Study and Examination Rules specify the conditions for studies in bachelor and master study programs.
2. Bachelor study programs are of standard duration between 3 and 4 years, they are practically focused and form the basis for potential subsequent studies in follow-up master programs. Graduates acquire a university diploma with the "Bc." degree.
3. Following master studies take 2 years, they enable improvement of theoretical knowledge and develop creativity. Graduates acquire a university diploma with the "Mgr." or "Ing." degrees – depending on the field of studies.
4. Doctoral study programs are of three years or four years in duration, they focus on scientific research and independent creative work. Graduates acquire a university diploma with the "Ph.D." degree.
5. The Academic year commences in the second half of September of the calendar year 2023 and ends in the first half of September 2024. The Academic year is divided into winter and summer semesters. Each semester includes teaching (usually 14 weeks) and examination periods (usually 5 weeks). The last semester of the bachelor and master programs is shortened (usually 10 weeks).
6. Studies take place in attendance and combined form, tuition usually takes place in the form of lectures, seminars and tutorials. Tutorials and seminars are usually obligatory classes. Combined studies are intended for employed students and take the form of several multiple day education courses.

Studies at UJEP – Main Regulations

7. Foreign students are accepted for attendance studies only.
8. The basic unit of the study program is a subject of study. The study program classifies subjects according to their status as follows:
 - a) obligatory subjects - must be taken to graduate from the relevant study program,
 - b) compulsory-optional subjects – are part of the module from which a minimum number of subjects must be taken, or a minimum number of credits must be acquired to graduate from the relevant study program,
 - c) facultative subjects – are other subjects from the relevant study program and depend on the student's own choice.
9. UJEP uses the credit system based on the principles of the European Credit Transfer System (ECTS). The recommended annual study plan is of 60 credits proportionately divided among the subjects in the plan regarding the amount of study necessary for taking these subjects.
10. The credit tests and examinations students take and acquire credits for as registered in the given academic year, are a method of verifying the progress of one's studies. The subject may be registered twice during the study program (each registration allows a maximum of 3 attempts). A state bachelor's examination may only be applied for after 180 credits are acquired, application for the follow-up master program final examination is conditioned by the acquisition of 120 credits.
11. The allocated number of credits is not dependant on how well the student passes the relevant subject. How well the student does in the subject is expressed by classification of the examination:
 - a) excellent or 1 (grade A),
 - b) very good or 2 (grade B–C),
 - c) good or 3 (grade D–E),
 - d) failed or 4 (grade F).

12. Progress to the next year of studies is specified by the UJEP Study and Examination Rules. At entering the second year of study, the student is to have acquired the following:
- a) in the field of arts on acquisition of at least 54 credits,
 - b) in the field of technical sciences on acquisition of at least 30 credits,
 - c) in other programs on acquisition of at least 45 credits.
13. One's studies are completed by passing the state bachelor's examination, including defense of the bachelor's dissertation; state final examination in follow master's studies, including defense of the diploma thesis; and state doctoral examination, including defense of the scientific work for doctoral programs. The graduate acquires a university diploma supplemented with a complete list of subjects taken, listed in the Diploma Supplement.
14. For all enrolled studying in study programs in the Czech language studies are free of charge (with the exception of fees for acceptance proceedings – approx. CZK 500). Studies in programs accredited in a foreign language (English, German) are subject to fee.

Academic year 2023/2024

Winter semester starts in the second half of September and ends in the first half of February.

Summer semester starts in the second half of February and ends at the end of June.

Our university is a diverse unity whose advantage is the variety of study programs, ranging from social-economic and nature up to technical sciences. The unique regional character of the university enables students of nearly all study programs to enjoy the advantages of combining theoretical knowledge and practice (cooperation with regional companies and institutions on implementing new technologies, carrying out economic analyses, performing environmental protection activities, providing social and pedagogic assistance, mapping and conserving cultural heritage, providing health care and physiotherapy services, creating modern design, etc.) This practical aspect also has an international character. The university widely participates in both EU (e.g. Erasmus+) as well as national programs of development supported by the Ministry of Education, Youth and Sports and the Ministry of Foreign Affairs.

The ample dormitory capacity and one of the highest accommodation scholarships in the Czechia that the university grants, along with the wide variety of available freetime activity options make UJEP a modern and attractive place to study.

- Most study programs are accredited for daily and distance studies
- BSc undergraduates are awarded the degree of Bc.
- MSc graduates are awarded the degree of Ing./Mgr.
- PhD postgraduates are awarded the degree of Ph.D.

Notes:

1) Forms of Study: F – full-time, C – combined (part-time);

© – a field of study in which the faculty has acquired the authorization to perform state Viva examinations and grant the title of PhDr.

© – a field of study in which the faculty has acquired the authorization to perform state Viva examinations and grant the title of RNDr.

FACULTY OF ART AND DESIGN

2-year MSc Study Programs/Fields

Code	Study program	Studio	Form of Study	Language
N0213A310002	Fine Art	Photography	F	English

The student of the following master's degree course of Fine Art – Photography will undergo systematic and specialized training preparation for a career of an independent photographer, and will also experience the stimulating atmosphere of a students' community drawn from different cultural and language backgrounds. The high level of study is assured by the international experience of most of the team members who are knowledgeable lecturers (holding positions as visiting lecturers, with repeated foreign lecture activity, organisation of workshops, attendance at creative sessions and important exhibition activities) and also by their professional teaching of students within the developed and accredited, follow-master's course in photography in the Czech language.

The graduate of the course will be professionally equipped with systematic,

structured knowledge and skills leading to a career as an independent artist, a creative executive of advertising and marketing agencies, graphical studios, or as a publisher. The student may also become a trustee of museums or galleries with photography collections and exhibition activities. The student of this branch will at the same time acquire the foundations of polemic-critical thinking, and will develop skills of perception, analysis and reflection of photography as an autonomous artistic discipline. The study concept will at the same time impart to the applicant's basic orientation in the Czech cultural environment, in the extended Central European visual culture framework and to acquire knowledge of the standing of photographic media within this context. A feature of the English variety of the photographic study is its major inter-disciplinarity and permeability, built on the coordinated cooperation of current studios (Photography, Applied and advertising photography and Interactive media).

3-year PhD Study Programs/Fields

Code	Study program	Code	Study fields	Form of Study	Form
P 7105	Historische-Wissenschaft	7105V012	Tschechische Geschichte	F, C	German

A graduate of the doctoral study program in the field of Czech history (20th century History of the Czech Lands) will acquire good and reliable orientation in the field and excellent mapping within the respective specialization. The student will acquire an approach to manage the methodology and theory of historical science (including varied comparative aspects), will acquire an overview of the development of historiography and will be prepared for independent scientific work in the field of history. A graduate

in this field should be capable of executing and directing independent historical research, presenting results in the form of scientific publications and appearances in scientific conferences in Czechia and abroad. Graduates will be able to find employment in all institutions, which deal with historical subjects in the fields of Czech and Czechoslovak history, specific areas, in the field of Czech-German relations, in scientific institutions, archives, museums, the appropriate administrative institutes and more. Preparation for pedagogical activities also enables graduates of the doctoral study program to work as university lecturers and professors, either as employees of a university or as freelance co-workers, or workers with unemployment at a scientific workplace.

Code	Study program	Form of Study	Form
P0532D330032	Geographies of Transformations	F, C	English
P0533D110038	Computer Modelling in Science and Technology	F	English

Geographies of Transformations

This doctoral study programme develops our understanding of transformations of geographical systems (exploring causal roots, tracing transformative paths, narrating uncertainties) to address challenges of socio-environmental development at various institutional scales and in different regional contexts. The focus is on Exploring the feedback from collateral socioeconomic, cultural and environmental processes and their manifestation in space and places, the programme develops a career path for experts in strategic, regional and environmental planning.

The major research topics include:

- Management of traditional cultural landscapes under the conditions of environmental change;
- Transition initiatives and urban adaptations to climate change;
- Changing policies and agents in shrinking cities;
- Effects of cultural globalization on sustainable livelihood in marginal areas;
- Visual presentation of changes in people's spatial behaviour;
- Governing ecological insecurity in a trans-national comparative perspective.

The programme is interdisciplinary and international in its nature and prepares students for their further career in strategic regional and environmental planning in public and private sectors, NGOs, as well as in research organizations.

Computer Modelling in Science and Technology

The doctoral study program prepares its students for solving demanding computational problems in science and technology using high performance computers. The students will deepen their knowledge in selected parts of mathematics, physics, and computational methods. Compulsory courses, exams and the topic of the student's Ph.D. thesis are proposed by the student and his supervisor in the beginning of the study. The individual study plan of each student should include:

1. A course of mathematics;
2. A selected course of basic theoretical physics;
3. A selected course of physics focused on the selected research topic;
4. A selected advanced course of computer modelling.

The selected topic of the Ph.D. thesis must be in the field of computer modelling. A list of available topics involves different problems, e.g., computer simulation at the molecular level, mesoscopic modelling, computational fluid dynamics, modelling

granular materials, aerosols, processes in plasma, astronomy and astrophysics.

Graduates will be able to find jobs mostly in the academic sphere, research, and industry or other companies dealing with high performance computing.

Applied Nanotechnology

A doctoral study program Applied Nanotechnology follows the master study program of Nanotechnology. The doctoral program has multidisciplinary structure necessary for up-to-date research in nanotechnologies and material sciences generally. The topics have necessary overlaps to another science fields for broad education. The study of nanotechnologies, nanomaterials and their applications would

Study Programs and Courses Taught in Foreign Languages and their Structure

provide students with deep background in topics related to the doctoral thesis. The study topics will be divided to the following groups:

1. Nanomaterial prepared by physical techniques;
2. Nanomaterial prepared by chemical techniques;
3. Bio nanotechnologies for bio sensing applications;
4. Computer aided design of nanomaterial.

A goal of the study is to prepare students with skills and knowledge in nano fields. The main interest will be on the techniques applicable in industry and not only in research laboratories as for example drugs, cosmetics, selfcleaning dyes, antibacterial products, biomedical materials, etc. The students should be well prepared for academic research and industry research developing new nano featured materials. It will be supported by obligatory industrial training period during the doctoral study. Students will be encouraged to participate in management and marketing courses organized by the university. Experts from industry will hold short lectures for the students.

The courses are concluded with an official exam and the issue of the Certificate of Achievement.

UJEP Participation in the Erasmus+ Program

One of the advantages of our university is the opportunity of UJEP students to study at contractual foreign universities one or two terms in the course of their studies, mainly with financial aid of the European Union. The most common form of studies is the Erasmus+ Program by means of which about 160 UJEP students annually study abroad. They can choose from more than 280 foreign universities from 27 European countries with which UJEP has inter-institutional agreements.

UJEP also sends students for traineeships within the Erasmus+ Program. With the financial aid of the Erasmus+ Program, they can complete 2–12 months of training in firms, businesses and institutions.

Within the Erasmus+ Program, about 60 academic workers from European universities give lectures at UJEP and more than 120 academics leave UJEP to lecture in contractual universities every year.

UNIVERZITA J. E. PURKYNĚ V ÚSTÍ NAD LABEM

Ústí nad Labem City and the Ústí Region

Czechia / Basic Information

The university town of Ústí nad Labem is an industrial metropolis in North-west Bohemia, with nearly one hundred thousand inhabitants. It has assumed its strategic position on the Elbe River – the river route to Hamburg – since the 11th century. In the opposite – upstream – direction it represents a symbolic entrance gate to Bohemia (Porta Bohemica). The history of the city has historically been rather troubled since it is linked to a number of military conflicts, regularly interrupting its periods of development. One of the bloodiest of the conflicts was when the armies of Napoleon were beaten by the allied armies of Russia, Prussia and Austria in 1813. More than a century later, the town suffered its last wartime hardship in April 1945 in the form of an air raid by the American 8th air squadron. The second most tilted tower in Europe – the tower of the Church of the Ascension of the Virgin Mary, deviating from its axis by nearly two metres – remains a memory of the event.

The industrial history of the town was initially linked to silver and tin mining and processing, later to the development of fabric industry and subsequently to brown coal

mines and the development of chemical industry, the establishment of sugar refineries, breweries as well as alcohol distilleries, to the introduction of steam navigation and construction of the Masaryk locks and electricity generation plant under the Střekov castle.

Today, the regional town of Ústí nad Labem offers varied cultural and social opportunities (for instance the Municipal Theatre of Opera and Ballet, the Theatre Studio, the Culture Hall, the National Hall, the museum of the town of Ústí nad Labem, two natural cinemas, a number of galleries, the North Bohemian Science Library, The amunicipal spa, the zoological gardens the Větruše look out tower and restaurant). The advantage of this regional town with regard to sport activities and activities in nature, is its location in the Elbe valley between the Czech Central Mountains and the Ore Mountains. Its proximity to the Czech Switzerland National Park and the Elbe sandstone protected nature reserve make the town and the whole Ústí region attractive to tourists.

The hilly terrain of the region with abundant bodies of water provides ideal conditions

for cycling, hiking (or possibly a combination of both), mountaineering, paragliding, water sports and winter skiing. There are also tennis courts, bowling halls, stadiums and sport halls in the town as well as riding schools and golf courses in the surrounding areas. See www.usti-nad-labem.cz for more detail. There are a number of nature sites near the town of Ústí nad Labem,

some true European rarities. These include for instance the Vrkoč natural monument (a column such as a formation of basalt), the 12 metre high Vaňov waterfall (4 km from the city centre), Koží vrch (a craggy massif with abundant thermophilic vegetation).

The official currency in the Czechia is the Czech Crown – česká koruna (CZK). Exchange rates approx.:

1 EUR = 25 CZK

1 USD = 25 CZK

The Czechia is divided into 14 regions with municipalities: Brno, České Budějovice, Hradec Králové, Jihlava, Karlovy Vary, Liberec, Olomouc, Ostrava, Pardubice, Plzeň, Praha, Ústí nad Labem and Zlín. It has a transitional climate between maritime and continental characterized by hot, showery summers and cold, snowy winters and generally changeable conditions. On a typical day in Czechia between June and August the maximum temperature is between 15°C and 25°C. Temperatures from December to February drop below

freezing. Wide variations are common, with temperatures of +35°C in summer and –20°C in winter not being very unusual.

Czechia can be rightly called the crossroads of European civilizations. It is situated approximately in the geographical centre of Europe and has an area of 78,866 sq. km. It is a landlocked country 326 km from the Baltic and 822 km from Adriatic sea. It shares borders with Germany, Poland,

Czechia/Basic Information

Austria and Slovakia. The highest point of elevation is the peak of Mt. Sněžka (1,603 m above sea level) and the lowest point of elevation is near Hřensko where the River Labe leaves the Czech territory (117 m above sea level).

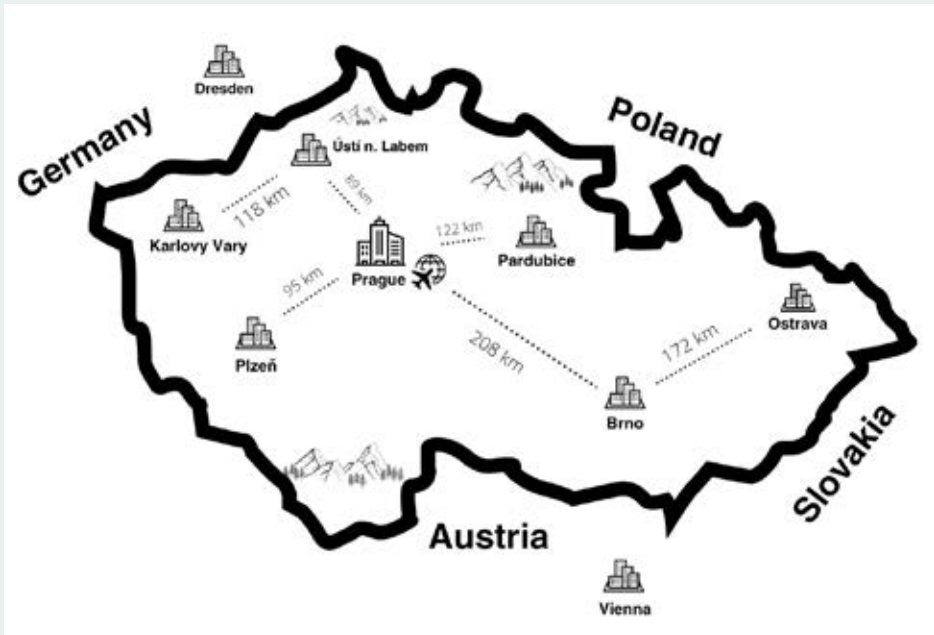

Some sites in Czechia have been listed in UNESCO's World heritage Fund:

Praha, Kutná Hora, Český Krumlov, Telč, Lednice-Valtice area, Zelená Hora Church of St. John Nepomuk, Castle and gardens of Kroměříž, Holašovice, Litomyšl castle, Holy Trinity Column in Olomouc, Tugendhat Villa in Brno, The Jewish Quarter and St. Procopius' Basilica in Třebíč.

SOME HISTORICAL DATA

- End of the 5th and beginning of the 6th century – arrival of Slavs in the area of present-day Moravia and Slovakia.
- Second half of the 9th century – arrival of Christian missionaries.
- 1306 – a gradual strengthening of the Czech state during the reign of the Premyslid dynasty. 1346–1378 – the peak in prestige and power of the Kingdom of Bohemia during the reign of Charles IV.
- Beginning of the 15th century – a crisis of state leads to the Hussite movement.
- 1526 – the Habsburg dynasty succeeds to the throne of Bohemia – the formation of a multinational empire.
- 1620 – the defeat of the Bohemian Estates at the Battle of the White Mountain, continued centralization of the Habsburg Empire.
- 1918, October – foundation of an independent state of Czechs and Slovaks (Czechoslovakia).
- 1939, March – 1945, May – German occupation.
- 1948, February – Communist takeover.
- 1968, August – Soviet-led invasion of Czechoslovakia by Warsaw Pact countries brings an end to the "Prague Spring" and the Communist Party's attempt to build "Socialism with a human face".
- 1989, November – fall of the Communist regime.

- 1993, January – Czechia founded after the split of Czechoslovakia.
- 2004, May – Czechia becomes a member of the EU.
